Sir:

The Notice of Allowance mailed 02/01/2005 (part of paper number/mail date 2005012) indicates a 3 day patent term adjustment. This term adjustment is further illustrated on the Patent Term Adjustment History (the "History") obtained from PAIR.

On 03/08/2005, a telephone call to the PAIR Technical Support Office (703.305.3028) brought to the Office's attention the following facts: (1) an information disclosure statement (the "first IDS"), not listed on the History, was mailed to the Office on 04/16/2004 via first class mail, acknowledged as received and "placed of record in the file" by the Examiner in the Office Action mailed 07/13/2004 (part of paper number/mail date 20040708); and (2) the information disclosure statement listed on the History as having a filing date of 09/29/2004 (the "second IDS") was actually filed on 09/22/2004. During this telephone conversation, the Office confirmed the above facts while indicating that while the History was not accurate, the Image File Wrapper properly accounted for these filing dates.

CHICAGO/#1344682.1

10/784,835  
COMMENT 43 LETTER  
AT NOTICE OF ALLOWANCE

PATENT

Assurances were given that the History would be appropriately updated within five to seven business days.

In support of the above facts above, there are, attached hereto, copies of: (1) the History; (2) the Image File Wrapper; (3) the Office Action mailed 07/13/2004 confirming the Office's receipt of the first IDS; and (4) the express mail receipt and stamped postcard indicating the 09/22/2004 filing date of the second IDS.

As provided by the Office's response to Comment 43 on the revision of the Patent Rules implementing provisions of the American Inventors Protection Act of 1999, a registered practitioner's obligation of candor and good faith applies to a practitioner's acceptance of the patent term adjustment as determined by the Office. *Changes to Implement Patent Term Adjustment under Twenty-Year Patent Term*, 65 Fed. Reg. 56,366, 56,387 (Sept. 18, 2000).

In accordance with the Office's response in the Federal Register, the term adjustment as provided in the Notice of Allowance is thought to be longer than appropriate. Therefore, this letter requests the Office to review the 3 day patent term adjustment as indicated in the Notice of Allowance in light of, among other things, the 04/19/2004 and 09/22/2004 filing dates described above.

Respectfully submitted,

**DETAILED ACTION**

1. It is hereby acknowledged that the following papers have been received and placed of record in the file: Preliminary Amendment (dated 2/23/04), IDS (dated 2/23/04 and 4/19/04) and Drawings (dated 4/19/04).
2. Claims 1-22 have been cancelled. Claims 23-152 have been added.
3. Claims 23-152 are presented for examination.

***Double Patenting***

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 23-152 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 23-146 of copending Application No. 10/784,396. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of Application No. 10/784,396 pertain to a method while the claims of the present application pertain to the apparatus to implement the claimed method steps of Application No. 10/784,396.

Application/Control Number: 10/784,835

Page 3

Ar Unit: 2116

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
